

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A method of rendering an object from a text and numeric centric line of business application to a graphical user interface centric content manager client application comprising:
 - a. requesting the object from a line of business application [[[.]]] ;
 - b. the line of business application ~~initiates~~ initiating an associated host initiated display application program interface, and calling a workstation listener;
 - c. ~~the a~~ a content manager host sending the customer application request to a workstation listener;
 - d. the workstation listener ~~launches the~~ launching an associated content manager graphical user interface client;
 - e. the content manager graphical user interface client ~~builds the~~ building a request for the object and sending it the request to the associated content manager application for the associated host initiated display; and
 - f. the content manager application responding to the interface centric content manager client and rendering the object to the user.
2. (Currently Amended) The method of claim 1 wherein the requested object is selected from ~~the a~~ a group consisting of displays, prints, and folder contents.

3. (Currently Amended) A computer system comprising ~~[[[a]]]~~ an interface centric content manager client application, a resource manager, a library server, and a line of business application, and a host initiated display application program interface between the line of business application and the interface centric content manager client application.

4. (Currently Amended) The computer system of claim 3 adapted to render an object from a text and numeric centric line of business application to a graphical user interface centric client application by the steps of:

- a. requesting the object from a line of business application;
- b. the line of business application initiating ~~[[[a]]]~~ an associated host initiated display application program interface, and calling a workstation listener;
- c. ~~[the]~~ a content manager host sending ~~the~~ a customer application request to a workstation listener;
- d. the workstation listener ~~launches the~~ launching an associated content manager graphical user interface client;
- e. the content manager graphical user interface client ~~builds the~~ building a request for the object and sending ~~it~~ the request to the content manager application for the associated host initiated display; and
- f. the content manager application responding to the interface centric content manager client and rendering the object to the user.

5. (Currently Amended) The computer system of claim 4 wherein the requested object is selected from ~~the~~ a group consisting of displays, prints, and folder contents.

6. (Currently Amended) A program product comprising a substrate with computer readable code for configuring and ~~control~~ controlling a computer to render an object from a text and numeric centric line of business application to a graphical user interface centric content manager client application by the steps of:

- a. requesting the object from a line of business application. ;
- b. the line of business application initiating a an associated host initiated display application program interface, and calling a workstation listener;
- c. ~~the a~~ a content manager host sending ~~the a~~ a customer application request to a workstation listener;
- d. the workstation listener ~~launches~~ launching the content manager graphical user interface client;
- e. the content manager graphical user interface client ~~builds the~~ building a request for the object and sending it ~~the request~~ the request to the associated content manager application for the associated host initiated display; and
- f. the content manager application responding to the interface centric content manager client and rendering the object to the user.

7. (Currently Amended) The program product of claim 6 wherein the requested object is selected from ~~the a~~ a group consisting of displays, prints, and folder contents.
